

Desert Storm 2016

Power in the Park Festival

Outlaw Grand National Boat Race

GN race boats (Grand National) are a part of Havasu history with the class having competed here since the early days of the “Havasu Classic” races. These water borne hot rods have big, blown automotive V8 engines and, from their modified Le Mans start at the beach, they thrill the crowds and they will take to the water twice a day at the Power in the Park Festival, thanks to Ross Wallach our competition director. Their pits will be open and free to spectators like all of the Power in the Park activities. These boats will be displayed in the Springberg McAndrew Park during the Desert Storm Street Party.
